Listening, Learning, and Leading
Every student, every day, whatever it takes!
“There is no end to education. It is not that you read a book, pass an examination, and finish with education. The whole of life, from the moment you are born to the moment you die, is a process of learning.”
Jiddu Krishnamurti

There is no end to learning; rather, there are many beginnings. The search for knowledge is an infinite journey. What we currently know is merely a framework that helps us predict events and the consequences of our actions. Each of us sees the world through our own individual frameworks, but there is no “one true knowledge.” We can always seek to learn more, discover more, and search for new perspectives. We can change our framework day in and day out, month by month, and year by year, if we continue to learn.

As individuals and society, we have always been challenged to discover knowledge. There are so many competing ideas in the world, not to mention all the unknowns yet to be discovered. We choose ideas to build our worldviews. We select or reject different ideas and theories based on our understanding of them. But we are fortunate because we can always learn more and change our understanding. This process of learning never stops.

There is no end to our search for knowledge and our capacity to learn new things. Today is just the beginning.
